SUMMARY

Software Engineer with hands-on experience developing mobile applications, cloud-based solutions, and AI-integrated systems. Delivered a native iOS version of a pediatric neurology app, enhanced its Android counterpart, and built ETL pipelines and a proof-of-concept AI chatbot on Google Cloud. Proficient in Python, Java, JavaScript, Swift, SQL, and Google Cloud Platform services. Eager to apply this blend of full-stack and data engineering expertise to drive innovative software solutions.

EDUCATION

Arizona State University (ASU)

B.S, Computer Science (GPA: 3.56)

2023 - 2026

Tempe, Arizona, USA

• **Achievements:** Dean's List for 2026 Spring, 2025 Fall, 2024 Fall and 2023 Fall Semesters

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL, C/C++, Bash, Swift
- **Software Development:** Git, GitHub, Linux/Unix, HTML/CSS, Android Studio
- **Cloud & AI:** Google Cloud Platform (BigQuery, Compute Engine, Cloud Storage), Vertex AI, AgentSpace
- **Databases:** PostgreSQL, BigQuery
- **Tools:** Jupyter Notebook, Power BI

WORK EXPERIENCE

Sturge-Weber Foundation | Software Engineer

Sep 2025 - May 2026

- Engineered a native iOS version of an existing Android medical application using Xcode and Swift, ensuring full feature parity for pediatric neurology care.
- Refactored and enhanced the original Android application using Android Studio (Java/XML), integrating new features and UI overhauls to achieve production-grade readiness.
- Advanced the app into rigorous testing phases using GitHub CI pipelines and JUnit, which cleared beta testing and positioned the product for public launch

Cloud Space | Data Engineering Intern

Jun 2025 - Aug 2025

- Built and maintained ETL workflows and SQL queries in BigQuery on Google Cloud Platform, using Bash scripts and GitHub for version control, which streamlined data pipelines and enabled timely analytics reporting
- Developed a proof-of-concept AI chatbot with Vertex AI and AgentSpace, integrating it into client demo environments, which showcased automation capabilities and secured interest for further development
- Assisted in organizing and transforming client datasets using SQL and Bash scripts on Google Cloud Platform, preparing them for cloud analytics and reporting systems, which improved data readiness for downstream analysis

PROJECTS

RAG-Powered Resume Chatbot [RAG-Powered Resume Chatbot \(Python, Streamlit\)](#)

Jun 2026

- Developed a RAG-powered resume chatbot using Gemini embeddings, FAISS vector retrieval, and LangChain orchestration for accurate, fact-based answers
- Deployed a fully interactive Streamlit UI on Streamlit Cloud for seamless live demonstrations

Personal Portfolio Website [Personal Portfolio Website \(HTML, CSS, JavaScript\)](#)

Feb 2026 - Mar 2026

- Developed and deployed a responsive personal portfolio website using HTML, CSS, and JavaScript
- Showcased software engineering, data analytics, and cloud projects with GitHub project links
- Hosted using GitHub Pages with responsive design principles

Sturge-Weber Foundation App [Sturge-Weber Foundation App \(Java, XML\)](#)

Aug 2025 - May 2026

Sturge-Weber Foundation

- Developed mobile application features including timers, educational content pages, and medical analytics functionality
- Designed and implemented reusable UI components and navigation workflows to improve application usability and maintainability

EXTRACURRICULAR

ASU Badminton Club

2023 - Present

- 4-8th place (Quarter-finals) in Birdies' Cup (2023 Fall)

American University Program, INTI College | President

2022 - 2023

- Led and organized INTI's first in-campus event (July 4th Barbeque) and first off-campus event (Homecoming Night) following the COVID-19 pandemic
